

Arie's interest in the prophets began when his father, evangelist Arie R.J. Blomerus (1910 - 1997) introduced him to the prophetic messages of the Biblical prophets. He was inspired to investigate the deeper meaning of their prophecies and to share some of what he learned through this book.

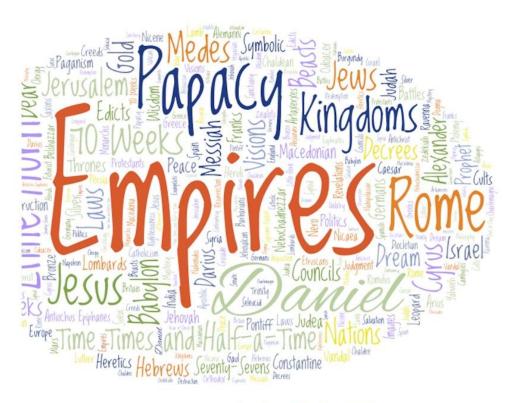

The author covers the dream of Nebuchadnezzar, Daniel's vision of the four beasts emerging from the sea and his vision of the Seventy Sevens. He presents an analysis of the primary meaning of the symbols presented in these visions and how it all played out in the history of the world. The prophecies of Daniel are clearly lavered with symbols representing something of significance and for us living in modern times, a superficial reading of his prophecies makes no sense at all. Most people find it extremely difficult to see the connection between a prophetic symbol, such as a ten-horned beast, and the event or thing it represents or, the expression of time in phrases such as "a time, times and half a time" or that a certain event would occur after a certain number of days or years have expired. People sometimes, in their effort to find the perfect solution for each and every problem presented by a prophecy, forget what the real message of the prophet was. The author took care to present an interpretation that covered all aspects of the prophecies he analysed and, in doing so, he applied a balanced approach taking care not to lose sight of the actual message portraved by the prophet.
